STATE PEACH CROP DEVASTATED BY FEBRUARY DEEP FREEZE

By Steve Jensen
Office of Commissioner
Steven K. Reviczky

As temperatures plummeted below zero during the second weekend of February, Glastonbury fruit growers Peter Teveris and his daughter Erica were of differing minds as to how the seven acres of peach trees at their Woodland Farm would fare in the deep freeze.

"He was definitely very concerned and I was saying we never lose *everything*, we'll be fine," Erica recalled. "I was wrong. This is a pretty big deal for every fruit grower in the area."

When the cold snap subsided, the Teveris' cut off a bundle of branches that were brought indoors, placed in water and monitored for a couple of weeks.

It's a common agricultural experiment done in hopes of seeing at least some buds pushing out signs of a live fruit or leaf bloom.

Instead, Erica said: "The buds just fell off the branches," a sign that their crop was likely doomed.

The Teveris' experience undoubtedly played out at countless fruit farms around Connecticut and the rest of southern New England after the freeze that has become known as the "Valentine's Day Massacre" in the farming world.

Crop losses of peaches and other stone fruits like plums and nectarines - which put their buds out soon after the previous year's harvest - are expected to be in the 90-percent range.

The extreme damage was caused not just by the sub-zero temperatures, but by the relative warmth of the winter up to that point that prevented the buds from "hardening" themselves against the cold.

Peter believes the problem was also worsened by the

presence of sap in the tree and the buds, again due to the mild winter that kept it from descending into the roots, that froze when the cold spell hit.

"It was 12-below one night and 7-below the next," Peter recalled of that weekend. "A couple of days earlier it was in the 50s. We've been growing peaches for more than 30 years and I've never seen it this bad for us."

As he and his daughter walked through a hillside peach grove late last week to see if any buds were perhaps still viable, Erica pulled out her cell phone to show a visitor a photograph she had taken last spring when the trees were in full bloom, and one she took in the same spot this year that showed barren-branched trees resembling brown skeletons.

"Normally this would be all pink," she said as she looked

(Continued on page 3)

MISCELLANEOUS

6-R. Farm/Land specializing in land, farms, and all types of Real Estate. Established Broker with a lifetime of agricultural experience and 40 years of finance. Representing both Buyers and Sellers. Call Clint Charter of Wallace-Tetreault Realty (860) 644-5667.

24-R. The Connecticut Military Department has indoor stalls for lease at the Governor's Horse Guard facilities in Avon and Newtown. Monthly rate is \$350.00. For further information, please visit our website at www.ct.gov/mil/stall-lease or call 860-524-4968. Proceeds benefit Connecticut Governor's Horse Guards.

CT FARM EMPLOYMENT CONNECTION

53-R. Vegetable Grower wanted, PT/FT. Farm owners looking for the right person to expand farm's existing acreage in production to include vegetables. Please contact Charles for information at 203-214-1408 or crbeasely@albertus.edu.

56-R. Full time position available. Angus cattle farm. Construction work. Call or text 860-559-3009.

STATE PEACH CROP DEVASTATED BY FEBRUARY DEEP FREEZE**(Continued from Page 1)**

in vain to find a surviving bud. Next to a row of peach trees stood a few apricot trees that were outright killed by the cold snap.

The Teveris' believe a few varieties of their plums may have survived, as did the cherries and apples on their 35-acre farm, which is surrounded by several other fruit farms that suffered similar damage.

But it's the peaches that are the biggest draw at the dozen farmers' markets across the state where the Teveris' do almost all of their retail sales.

"Peaches are definitely our most popular fruit," Peter said. "On a good week we'll go through 150 boxes," containing a half-bushel each.

Farmers who still want to offer peaches to their customers may have to look in California, or as far south as Georgia and South Carolina.

Traditional peach-growing areas closer to home like New Jersey and the Hudson River Valley in New York also sustained considerable damage, if not the near-total wipeout further north.

The situation is expected to drive up the price of peaches, but cost is not what bothers Peter. Even if peaches are available in other states, he says he'd have a hard time offering them to his customers.

"After all these years of growing them," he said, "I'd hate to buy somebody else's peaches."

And although his peach trees won't bear fruit this season, Peter noted they can't just be ignored.

Pests like the peach borer and diseases like leaf-rot have to be dealt with, regardless.

"The trees might not have any peaches," Peter said with a chuckle as he prepared for a chore that he hopes will help his trees recover to bear fruit again next year. "But you still have to spray them."

UConn OFFERING SUMMER RIDING LESSONS

UConn is offering summer horseback riding lessons in Polo, Western, Trail, Hunt Seat, and Dressage at its Storrs campus.

Lessons are open to children 11 or older (Trail-13 years and older) and adults. Beginner to advanced levels will be offered by the university's Animal Science department.

There are several 2 and 3 week sessions available during the months of May through August. Cost is \$70.00 to \$315.00 per session, which are group lessons including six to eight students

Lessons will be held at the horse arena on Horsebarn Hill Road.

For more details please visit:

UConnSummerRiding.UConn.edu
